

The Eagle Has Landed!

**Automatically Scrubs, Vacuums & Microfilters;
Without Hoses, Pool Filter, Booster Pumps or You!**

The Eagle climbs 90° inclines from floor to waterline, including most stairs and benches, to automatically clean pools of any shape or surface type up to 50' in length in as little as 3 hours. The Eagle is even equipped with an adjustable timer for customized cleanings and can operate with "auto-controller systems." Compare Eagle to any other cleaner and see why it's the best engineered cleaner for your pool!

Just drop it in and press a button!
No hoses to untangle, no costly
booster pumps to run, and no filter
connections to slow you down.

With the Eagle you get:

- Maintenance cost savings of up to 50% (chemicals, water, energy)
- Complete cleaning of pools of any shape up to 50' in length
- Dual rotating scrubbing brushes loosen stubborn debris from all pool surfaces including waterline
- Offset vacuum ports for clog-free operation and better corner access
- 23-quart capacity reusable internal filter - more dirt and debris with less bag cleaning
- Industry's healthiest filtration and water circulation
- Convenient pool cleaning at the touch of a button
- Largest national robotic support network in the industry

The Eagle offers you the convenience of complete pool cleaning - floor and walls, including waterline and most stairs - at the mere touch of a button. Utilizing state-of-the-art microprocessor technology in cooperation with a multitude of sensors the Eagle completely cleans pools as large as 50' long, regardless of their surface type, in as little as 3 hours. Simply plug it in, drop it in and press a button, or plug into your pool's auto-control system and let it control the Eagle for you.

Unlike all other cleaner types only the Eagle offers the ability to cut your total pool maintenance expenses by more than 50%! Having its own built-in motors and filtration system the Eagle operates completely independent of the pool's filtration system, eliminating the need for sloppy, tangling hoses and costly-to-operate booster pumps, as well as decreasing pool filter usage and wear up to 60%. The Eagle cuts your total pool maintenance environment further by saving thousands of gallons of chlorinated water through the reduction of evaporation and main pool filter cleanings as much as 80%. The days of expensive yearly pool cleaner repairs are over as the Eagle is engineered for reliable, worry-free operation, engineered not to become stuck on stairs, lights, maindrains or ladders. Here's what else you get with the American made Eagle.

Scrubbing Action - The Eagle's front and rear rotating foot-long scrubbing brushes loosen and remove heavy dirt and fine particles from floor, walls and waterline to be vacuumed and trapped in its own internal microfilter bag.

Vacuuming - The Eagle's exceptionally high suction power and industry's largest vacuum intake ports are perfect to enable it to easily vacuum up dirt and debris, from palm and oak leaves to twigs and rocks and without clogging.

Built-in Filtration System - The Eagle will clean and purify 5,000 gallons of water per hour. The Eagle is equipped with the largest vacuum ports on the most expansive 23-quart, reusable microfilter bag that can hold up to more than 9 times the volume of debris that other cleaners with onboard filters can. It is capable of filtering out all types of large debris such as banana and oak leaves, twigs, seed spikes, coins, hair, pebbles and fine particles including sand, silt, algae and bacteria, and the filter bag is easily removed and rinsed clean.

Better Chemical Distribution - As a result of the Eagle's heavy-duty pumping action, the pool's bottom and surface water are circulated, raising the overall water temperature which reduces heating costs and creates a more even distribution of chemicals which normally settle to the pool floor. This provides for a more accurate water test as well, collectively reducing chemical consumption by as much as 30%.

Most Efficient & Reliable - Patented flotation guided radius turning system eliminates the addition of complex parts, enables complete cleaning of any pool shape or surface type, and reduces wasteful wear and tear operation by as much as 70%.

No Installation - Operation is as simple as dropping the Eagle into your pool, plugging it into its low voltage transformer and pushing a button. It does the rest by itself. The Eagle is the safest and easiest cleaner to use, and costs on average about 10¢ a day to run.

Low Maintenance - Constructed of corrosion-proof materials, with fewer than 10 moving parts needing little or no maintenance.

The Eagle scrubs pool walls, waterline and most steps while it vacuums & filters out pool dirt & debris.

The Eagle self-contained filtration system removes large debris and particles as small as 2 Microns.

Specifications

Designed for Pools:	Up to 50' length, any surface or shape
Suggested Cleaning Time:	3 hours (50' pool length)
Customization:	Yes, adjustable timer allows for customized cleaning cycles up to 7 hours or can operate automatically with auto-control pool equipment
Filtration Quantity:	5,000 gallons per hour
Cleaning Coverage:	6,500 square feet per hour
Electrical Requirements:	115v / 60Hz
Filtration System/Capacity:	Self-contained, 23-Quart capacity; Large leaves to fine particles - down to 2 microns
High Volume Filter Pump & High Performance Drive Motor:	Brushless, individually sealed with heat-dissipating and lubricating oil for longer motor life
Drive System:	Indirect belt drive - reduces stress load for longer drive motor life
Cord:	75' - buoyant thermoplastic rubber - No chlorine corroding Kevlar®
Operating Cost:	Approximately 10¢ per cleaning cycle
Wattage:	155 Watts
Voltage:	115 V / 60Hz, 24V at cleaner
Warranty:	1 Year Warranty
Safety & Reliability:	Cleaner, cord and power supply are ETL listed to UL Standards - the highest safety and reliability certification in the industry
Unit Dimensions / Weight:	16" x 14.5" x 10" / 17.5 lbs.
Shipping Dimensions / Weight:	17.5 x 17.5" x 19.5" / 38 lbs.
Vacuum Intake Port Opening:	2.75" x 9.75" Total Opening
